ALEXANDRIA, VIRGINIA 22313

Docket No.: 213954US2

ATTORNEYS AT LAW

RE: Application Serial No.: 09/961,255
Inventor: Bernard DIENY
RCE Filed: December 11, 2003
For: SPIN VALVE DEVICE WITH SPIN-DEPENDENT, SPECULAR ELECTRONIC
REFLECTION
Group: 1773
Examiner: UHLIR, Nikolas J.

SIR:

Attached hereto for filing are the following papers:

RECEIVED

JUL 02 2004

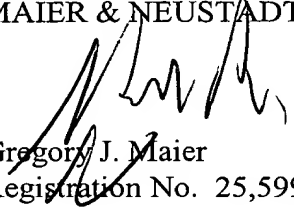

TC 1700

REQUEST FOR WITHDRAWAL OF ABANDONMENT
COPY OF NOTICE OF ABANDONMENT DATED MAY 4, 2004
COPY OF DATE-STAMPED FILING RECEIPT DATED DECEMBER 11, 2003
COPY OF REQUEST FOR CONTINUED EXAMINATION (RCE) TRANSMITTAL
COPY OF REQUEST FOR EXTENSION OF TIME (2 MONTHS)
COPY OF CANCELED CHECK NO. 300658 IN THE AMOUNT OF \$1,190.00
COPY OF DATE-STAMPED FILING RECEIPT DATED OCTOBER 14, 2003
COPY OF AMENDMENT TRANSMITTAL AND AMENDMENT

Our check in the amount of \$0.00 is attached covering any required fees. In the event any variance exists between the amount enclosed and the Patent Office charges for filing the above-noted documents, including any fees required under 37 CFR 1.136 for any necessary Extension of Time to make the filing of the attached documents timely, please charge or credit the difference to our Deposit Account No. 15-0030. Further, if these papers are not considered timely filed, then a petition is hereby made under 37 CFR 1.136 for the necessary extension of time.

Respectfully Submitted,

REQUEST FOR WITHDRAWAL OF HOLDING OF ABANDONMENT

COMMISSIONER FOR PATENTS
ALEXANDRIA, VIRGINIA 22313

Sir:

Responsive to the Notice of Abandonment dated May 4, 2004, Applicant herewith requests withdrawal of said abandonment for the following reasons. A Request for Continued Examination was filed on December 11, 2003, along with a two month Request for Extension of Time. Upon the Examiner's request, copies of the Request for Continued Examination, Request for Extension of Time, the Amendment filed October 14, 2003 and two date-stamped filing receipts were faxed to the Examiner on April 19, 2004. Signatures on the faxed copies of the documents listed above were inadvertently omitted. Enclosed herewith are copies of the date-stamped filing receipt and the cancelled check# 300658 for \$1,190.00 evidencing filing and payment of Governmental fees for the Request for Continued Examination and the two Month Extension of Time.

Application No: 09/961,255
Reply to Notice of Abandonment of May 4, 2004

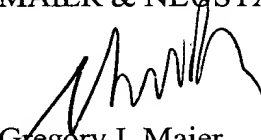

In order to expedite prosecution, Applicant's Attorney is submitting a signed copy of the Request for Continued Examination and a copy of the Request for Extension of Time filed on December 11, 2003. Applicant's Attorney also encloses a signed copy of Applicant's Amendment filed October 14, 2003 and a copy of the date-stamped Filing Receipt for Examiner's convenience.

It is believed that the above discussion and documents enclosed herewith clearly prove that the request for continued examination was subsequently signed and filed and therefore, the holding of abandonment was issued in error.

Accordingly, it is requested the holding of abandonment be withdrawn and that prosecution be allowed to continue in the present application.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.

TC 1700

This application is abandoned in view of:

1. ☒ Applicant's failure to timely file a proper reply to the Office letter mailed on 13 November 2003.
 - (a) ☐ A reply was received on _____ (with a Certificate of Mailing or Transmission dated _____), which is after the expiration of the period for reply (including a total extension of time of _____ month(s)) which expired on _____.
 - (b) ☒ A proposed reply was received on 19 April 2003, but it does not constitute a proper reply under 37 CFR 1.113 (a) to the final rejection.

(A proper reply under 37 CFR 1.113 to a final rejection consists only of: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114).
 - (c) ☐ A reply was received on _____ but it does not constitute a proper reply, or a bona fide attempt at a proper reply, to the non-final rejection. See 37 CFR 1.85(a) and 1.111. (See explanation in box 7 below).
 - (d) ☐ No reply has been received.
2. ☐ Applicant's failure to timely pay the required issue fee and publication fee, if applicable, within the statutory period of three months from the mailing date of the Notice of Allowance (PTOL-85).
 - (a) ☐ The issue fee and publication fee, if applicable, was received on _____ (with a Certificate of Mailing or Transmission dated _____), which is after the expiration of the statutory period for payment of the issue fee (and publication fee) set in the Notice of Allowance (PTOL-85).
 - (b) ☐ The submitted fee of \$_____ is insufficient. A balance of \$_____ is due.

The issue fee required by 37 CFR 1.18 is \$_____. The publication fee, if required by 37 CFR 1.18(d), is \$_____.
 - (c) ☐ The issue fee and publication fee, if applicable, has not been received.
3. ☐ Applicant's failure to timely file corrected drawings as required by, and within the three-month period set in, the Notice of Allowability (PTO-37).
 - (a) ☐ Proposed corrected drawings were received on _____ (with a Certificate of Mailing or Transmission dated _____), which is after the expiration of the period for reply.
 - (b) ☐ No corrected drawings have been received.
4. ☐ The letter of express abandonment which is signed by the attorney or agent of record, the assignee of the entire interest, or all of the applicants.
5. ☐ The letter of express abandonment which is signed by an attorney or agent (acting in a representative capacity under 37 CFR 1.34(a)) upon the filing of a continuing application.
6. ☐ The decision by the Board of Patent Appeals and Interference rendered on _____ and because the period for seeking court review of the decision has expired and there are no allowed claims.
7. ☒ The reason(s) below:

A request for continued examination was received on 12/12/2003, but was not entered for unknown reasons. Upon the examiners request, a copy of the RCE with a date stamped receipt was faxed to the examiner. However, a signed copy of the RCE could not be provided. Thus, the RCE does not comply with 37 CFR 1.114.

Paul Thibodeau
Supervisory Patent Examiner
Technology Center 1700

Petitions to revive under 37 CFR 1.137(a) or (b), or requests to withdraw the holding of abandonment under 37 CFR 1.181, should be promptly filed to minimize any negative effects on patent term.

AMENDMENT

COMMISSIONER FOR PATENTS
ALEXANDRIA, VIRGINIA 22313

SIR:

RECEIVED

JUL 02 2004

TC 1700

In response to the Official Action mailed July 11, 2003, please amend this application
as follows:

Amendments to the Claims are reflected in the listing of claims which begins on
page 2 of this paper.

Remarks/Arguments begin on page 5 of this paper.

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): A spin valve device comprising:

at least one stack of layers including an electrically conductive, nonmagnetic layer placed between first and second magnetic layers having a magnetization with a certain direction,

wherein at least one of said first and second magnetic layers ~~has directly at an interface with the nonmagnetic layer,~~ is in direct contact with the electrically conductive, nonmagnetic layer, and has at said contact, a specular reflection for conduction electrons dependent on an orientation of the spin of the conduction electrons relative to a magnetization direction in the first and second magnetic layers.

Claim 2 (Previously Presented): The device according to claim 1, wherein the magnetic layers having the specular reflection include a material selected from the group consisting of 1) ferromagnetic oxides based on at least one of iron, nickel, cobalt and chrome, and 2) ferromagnetic nitrides based on at least one of iron, nickel and cobalt.

Claim 3 (Previously Presented): The device according to claim 1, wherein the electrically conductive, nonmagnetic layer includes a material selected from the group consisting of copper, silver and gold.

Claim 4 (Previously Presented): The device according to claim 3, wherein the electrically conductive, nonmagnetic layer has a thickness less than approximately 10 nm.

Claim 5 (Previously Presented): The device according to claim 1, further comprising an anti-ferromagnetic layer adjacent to at least one of said first and second magnetic layers.

Claim 6 (Previously Presented): The device according to claim 1, wherein the at least one stack is deposited on a substrate.

Claim 7 (Previously Presented): The device according to claim 1, wherein the at least one stack is covered by a protective layer.

Claim 8 (Previously Presented): The device according to claim 1, wherein both of the first and second magnetic layers have said electron specular reflection.

Claim 9 (Previously Presented): The device according to claim 1, wherein the first magnetic layer has an electron specular reflection, the second magnetic layer does not have said specular reflection, but has a diffusion of the conduction electrons dependent on the orientation of the spin of the conduction electrons relative to the magnetization direction in said second magnetic layer.

Claim 10 (Previously Presented): The device according to claim 9, wherein the second magnetic layer having the diffusion of the conduction electrons includes a material selected from the group consisting of transition metals, and alloys based on at least one of nickel, iron and cobalt.

Claim 11 (Previously Presented): The device according to claim 10, further comprising a ferromagnetic layer adjacent to the second magnetic layer.

Claim 12 (Previously Presented): The device according to claim 1, wherein said at least one stack of layers includes a first stack of layers having the first electrically conductive, nonmagnetic layer placed between the first and second magnetic layers and a second stack of layers having a second electrically conductive, nonmagnetic layer placed between the second magnetic layer and a third magnetic layer, said second magnetic layer having a diffusion of the conduction electrons dependent on the orientation of the spin of the conduction electrons, the first magnetic layer of the first stack and the third magnetic layer of the second stack having in each case a specular reflection of the conduction electrons dependent on the orientation of said conduction electrons.

REMARKS/ARGUMENTS

Favorable reconsideration of this application as presently amended and in light of the following discussion is respectfully requested.

Claims 1-12 are pending in the present application with Claim 1 having been amended by the present amendment.

In the outstanding Office Action, Claims 1, 3-6 and 9-11 were rejected under 35 U.S.C. § 102(b) as anticipated by Swagten et al.; and Claims 1-3, 5, 6 and 8 were rejected under 35 U.S.C. § 103(a) as unpatentable over Singleton et al.

Applicant thanks the Examiner for the courtesy of an interview extended to Applicant's representative on September 5, 2003. During the interview, the differences between the present invention and the applied art were discussed. No agreement was reached pending the Examiner's further review when a response is filed. Arguments presented during the interview are reiterated below.

In item 34 at page 9 of the outstanding Office Action (i.e., the Examiner's Note), the Examiner indicates if the Applicant wants to require magnetic layer on a substrate such that no other layers can be present between the substrate and the magnetic layer, suitable language would be "a magnetic layer that is formed directly in contact with the surface of a substrate." In light of this indication, Claim 1 has been amended to recite that at least one of the first and second magnetic layers is in direct contact with the electrically conductive, nonmagnetic layer, and has at said contact, a specular reflection for conduction electrons dependent on an orientation of the spin of the conduction electrons relative to a magnetization direction in the first and second magnetic layers.

In a non-limiting example, Figure 2 illustrates at least one of the first and second magnetic layers (R, R') is in direct contact with the electrically conductive, nonmagnetic layer NM and has at the contact, a specular reflection for conduction electrons dependent on

an orientation of the spin of the conduction electrons relative to a magnetization direction in the first and second magnetic layers.

As noted in the previous amendment filed May 2, 2003, Swagten et al. disclose a spin valve device between two insulating layers, e.g., NiO layers (see Figure 1). The specular reflection appears between the lower NiO layer and the lower magnetic layer. The upper NiO layer does not generate specular reflection for technical reasons explained at the end of Swagten et al. That is, the specular reflection at the interface with the nonmagnetic layer is not generated by the magnetic layers of the spin valve, but rather the specular reflection at the interface with the nonmagnetic layers is generated by the lower NiO layer at the interface with the nonmagnetic layer.

Further, Singleton et al. teach specular scattering layers 101, 105 which are not in direct contact with a nonmagnetic layer.

Accordingly, it is respectfully submitted independent Claim 1 and each of the claims depending therefrom are allowable and the rejections noted in the outstanding Office Action have been overcome.

Consequently, in light of the above discussion and in view of the present amendment, the present application is believed to be in condition for allowance and an early and favorable action to that effect is respectfully requested.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
